

Project Summary

Located on the confluence of the Guadalupe River and Los Gatos Creek offers an avenue for reconnection between humans and nature. The design will focus on physical connections to reconnect the community of San José and pay homage to the people who built this city up. Globalization does shape cities, and the grand overhead structures seen throughout the design serve as a physical response to the social and physical global influences seen throughout San Jose.

Design Submission will focus on:

- The network of global connections
- Enhancing circulation
- Reactivating programmatic space
- Net-zero design
