

Project Summary

Reverse San Jose

San Jose is a dynamic, diverse, innovative, and vibrant. With the Reverse San Jose we aim to celebrate the unique character of the place and to highlight the identity of the region with innovative but laconic design, that creates the point of attraction for people – for visitors and citizens. Sustainable design realized with a glass solar panels creates an impression of light, flying structures, with a possibility to access to the viewing platform. In the night structure re-interpreted with lighting design, creating other silhouette remaining its famous historical predecessor – San Jose light tower.
