

Beautiful Cosmic Soul is a two-part landmark on Arena Green Park, San Jose, CA. There, one can find “The Tree of the Universe” and “The Portal of Beautiful Dreams”. With lights, organic forms, and augmented reality the landmark will take us beyond our temporary human materiality by finding connection to the cosmos and the metaphysical. Art is a channel to talk to, inspire action, and be of service to humanity by living, expressing, and sharing the adventure of conscious creation. In conception and evolution, art is visceral audacity and abundance: consciousness, enlightenment, and materiality where all possibilities already exist.
