

URBAN CONFLUENCE SILICON VALLEY

The Floating Pyramid is a new gathering place, a garden 170 feet above in air, supported by a single base. It symbolizes unique experience, technology and imagination.

The form is reversed pyramid generated by a cone cut in an angle, creating an opening at the center that houses series of cascading terraces facing towards down town San Jose.

The reversed pyramid and the nature at its crown express the spirit of Silicon Valley's heritage of democratic and innovative community.
