

LIGHTMARK

Project Summary

The Lightmark - as a three-dimensional symbol charged with meaning - responds to this inborn attitude of the city, honoring the perseverance of the population.

The enigmatic interaction is composed of two volumes, generated by the company the circle provides to the square and vice versa. The sphere of light represents IDEAS, levitating. The grounded 4D-cube structure represents the constructed based-connection to the world. Simple opposite figures that come together in one space to project a greater purpose.

The Lightmark's function is to be constantly sharing this enlightening creative energy - to be absorbed only in the City of Innovation.
