

Land Lux was completed as a continuous line across the site representing the history of San Jose as an architectonic path. The proposal is an individual figurative design on Arena Green that represents the history of San Jose as a timeline as positive and negative formations become programmatic. A vertical light beam pointing towards the sky acknowledges our human progression as we reach higher limits. As the only vertical part of the building, it lifts visitors upwards for a 360 degree view of the city,. The light beam connects site, terrain & earth to the cosmos. The responsibility to keep moving forward is in our hands.
