

Project Summary

TITLE: CONVERGE

The contemporary society is measured not only through infrastructure development, economic or military strength, but also through its heritage, culture and arts. This new iconic landmark will leave a lasting legacy for future generations that marks our present achievement. The sculpture will create an instant visual impact linking the east and west side of the bank, unifying the whole park, as well as regenerating its urban surroundings. As with any public art, the sculpture will be able to engage the local community by acting as a meeting place, to cultural shows and creating a new sense of identity.
