

Project Statement

As an internationally acclaimed artist, I feel uniquely qualified to undertake this art project, as my work focuses on creating site-specific sculpture projects which serve as points of attraction for diverse groups of people to welcome. This is a trait I believe is of the essence in designing for public spaces such as the City of San José downtown park where active user groups are always invited and pass by. My practice focuses on finding new ways of seeing the world with their surroundings.

I believe we need artists who integrate new sensations and emotions into the built environment. For the site which functions as spaces of continuous transition, we need public art that reveals how the spaces we pass by and spend our time living within have the potential to become distinct sites for enjoyable space. I am eager to explore these ideas for the site and look forward to presenting my sculpture to the Community Competition Panel.
