

Recurring themes are **PERENNIAL** and **PHOTOCHROMIC**.

Perennial stands for the mentality needed to succeed in Silicon Valley.

It attests to the history and spirit of Silicon Valley:

perseverance / resurgence / non-linear thinking / counter-culture / rooting on the fly /
decentralized / inventive / unpredictable / serendipitous meetings / mentoring / seedlings
/ spinning out.

It's always a culture / discourse / humus that leads to extraordinary results that elevate all.

Photochromic materials signify the most profound change in our sense of spacetime
brought about by our use of computers: the collapse of virtual and physical experiences.
