

*“Beauty is infinity expressed in a finished form”*

*Friedrich Wilhelm Schelling*

The **INFINITI** project is a dimensional symbol that represents the infinitude. It is an image of the infinite search accompanied by rises and falls.

The **INFINITI** structure is projected from top into an isosceles triangle, being a symbol signifying the universal laws of cosmic set-up.

It rests on three supporting points at the site, and “hangs” over the park and the river.

Similar to the confluence of *Los Gatos Creek* and the *Guadalupe River*, the **INFINITI** structure conflates two forms of existence: external layer **IsoTruss** made of isotopic carbon fiber structures **49ft.** in diameter and **195 ft.** high in a form of a spatial symbol of infinity, and internal space consisting of live energy generated from the natural process of biosynthesis of fruit orchards.

Facing is made of photovoltaic glass that converts sunlight it into electricity.
