

Aurora – Project Summary

Aurora is an iconic piece of civic hardware that comes alive through human engagement and a diverse mosaic of programmed spaces designed to bring people together and spark interaction and discovery. The design's intricate crossroads fosters chance encounters, picnics with friends, and napping under a tree. You can visit a museum, drop your kids off at day care, lose yourself in a hedge maze, jump on a trapeze net, get your hands dirty at the community garden, watch $8\frac{1}{2}$ at an outdoor film screening, and more, much more. In short, Aurora is a living, evolving, kaleidoscopic microcosm of public life, nature, and human connection.
