

THE TUBULAR PATH, and its large suspended ring draws all attention, the 2000 feet of interior path gives our proposal its iconic character. It is an element of union between environment and a learning path. It provides perspectives of the correct union of nature and the city. Proposal that highlights the meeting point of San José with the Guadalupe River and Los Gatos Creek. The intervention aims to symbolize a pairing between nature and sustainable future, and how learning and evolution go hand in hand.
