

# POINT CONFLUENCE

*"the loop of virtual existence"*

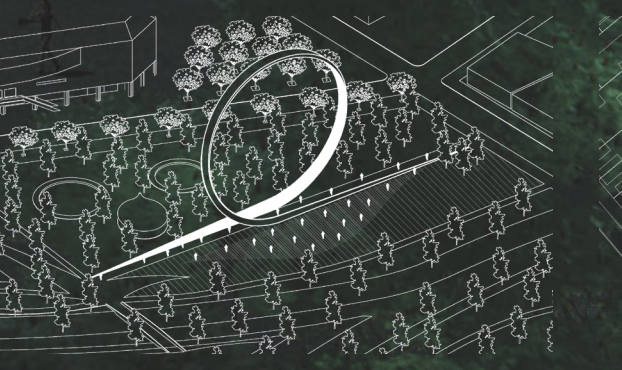

*in between the "Sap Center" and direct relation with the "Confluence Point", the selected site has instinctive potentials to generate connections with the pedestrian traffic around the significant elements of the park, in which the west side of the river has already gained recognition as a non-official open-air art museum of the community history and this features to be enhanced with the help of "POINT CONFLUENCE" that transforms and synchronizes the virtual co-existence of "present and future of the community" into an artistic language of light and dark, sound and silence.*

**the site**  
*the west side of the river is preferred as the locus of the landmark; enhancing the strong possibility of extensive flow and interactions with the high pedestrian activity of the elements of the park, SAP center, Diridon t-hub, and Google mixed-use plan, east side of the river becomes a natural overlook area for sunsets and fascinating artificial light shows and festivals ahead.*

**the landmark**  
*stretching out parallel to the city grid, the project offers a ribbon screen with a simple gesture - a bent "T" forming a loop into a "O" - symbolizing the binary coding system of computer language, "POINT CONFLUENCE" is a portal into a dream-like creative world, connecting people under the imagery power of the "virtual existence" of Silicon Valley.*

**the interaction**  
*this new looped trail of the park offers a semi-dynamic structure, a solid, exterior shell, and a hyperbolic, motion-sound sensitive, internal surface which is also the interface of the ribbon helping users to form a collective digital art through everyday movements and sounds. the duality symbolizes the logic of oppositions that balance the daily cycle of life.*

*"a new trail for silicon valley"*

there are natural trails alongside the Gaudalupe River that brings people around nature. "POINT" trail offers one of the most striking experiences of the valley, which reflects and shapes the history and possible future of Silicon Valley, which will bring people together for remembering the past, experiencing the moment, and foreseeing the future.
