

The "Pixelated Cloud" is a cluster of gardens and leisure spaces elevated 140ft from ground that looks like it hovers over the park from far. SJ being a lead in tech world, we can showcase the world how E-waste can contribute to the community architecturally. Copper and fiber glass from discarded electronics are reused as construction material. The tower is powered and ornamented by algae tubes; it is a bioreactor system where microalgae are cultivated. It luminate with an ambient of green to avoid destructive to the existing ecosystem it gives a dynamic effect of light and shadow at night.
