

Convergence and Catalysis

Urban Confluence at Arena Green – Project Summary

Attract Visitors

Confluence Tower will be an iconic landmark unique to San Jose. Inspired by the physical and phenomenological conditions of the site, the project reflects nature, alludes to the past, and hints to the future with materiality and technique.

Keep Visitors

We need to create a destination that people will want to spend time in order to create a strong catalyst for future surrounding development. Connecting the site with **The Bridges** and through public space amenities including the **Art Walk** and **The Wall**, **The Lookout**, and the **Terrace Steps**, will provide interest and convenience for moving in the park.
