

PROJECT SUMMARY

“Angel of Hope” represents human emotions which have created growth and development on the Planet. The primary structure of the monument represents life in the form of cosmic energy representing confluence of spirituality.

The abstraction of an Angel in the proposed design is a non-denominational representation of the spiritual values of the Native American Totem Poles, African burial mounds (Adinkra's), the Redeemer from Rio, a Stupa, or a Shivalinga depending upon perspective. The structure represents creativity and innovation of ideas, something that the city of San Jose and the Silicon Valley stand for the rest of the world.
