

Project Summary “the HEART: of the valley”

(100 Words excluding Title)

“The Heart: of the Valley” Project is composed of a 200’ gateway double arch in shape of a symbolic human heart, photovoltaic glass bridge and pool of reflection. The Iconic Heart is composed of a polish mirror stainless exterior skin and programmable LED interior skin with an elevator that takes visitor to the top of the heart to experience the views of the valley. Influenced by history of Santa Clara known as the “Valley of the Heart’s Delight”, the sculpture draws from its agricultural past, technological present and celebration of the heart of the people.
