

California Poppies

The California poppy is the iconic flower of the Golden State. By increasing its scale, our poppies become a iconic landmark, just what is desired for the Silicon Valley Urban Confluence in San Jose's Guadalupe Park. We propose a concept of landscape sculpture that will draw people to a remarkable and unforgettable sight, one that showcases the signature plant of the region.

The surfaces of the flowers are kinetic wind-driven textures and they are lit at night from sunlight absorbed and stored during the day. No watering required.
