

The outdoor park invites you to enter the large public space covered on the upper floor, where you can find the restaurant, the retails company or open-air festival. Pedestrians can cross the upper floor using a stair that's across the building's upper floor. The upper floor served as the perfect outdoor room for the client's relaxation and entertainment needs. The project develops around the intention of creating restaurant, retails company, playground, skaters, pond, basketball pitch, football pitch and a public place. Solar- Gain and green roof are positioned in the middle part of the building.

Thank you,

Suffian Abdussalam
