

Project Title: the LOL (Loop of Life)

SUMMARY

As the name shows, the design is a loop approach that makes it seem like an architecture defying the law of gravity whilst attending to the general functional aspects of the venue such as; creating a direct connection with the eastern stretch of the site across the confluence point. The design also compliments the events happening inside the Arena Green stadium as the main entry of the Western side functions as a seating area overlooking into the eastern wall of the Arena Green. The proposal inspires for an outdoor mega LED Screen to be showed to the people who has missed out the opportunity and also to the daily commuters of San Jose thereby increasing the social interaction of the public space.
