

Project Statement StarGate:

Introduction

This Project Statement has been prepared to explain the context, background, and design concepts showcased in my renderings and other documents supporting my submission.

Site Design

The proposed location is a city park within walking distance from SAP Center, downtown San Jose.

Site Location & Layout

In-between W. Santa Clara St. and W. St. John St.
Latitude: 37.333524
Longitude: -121.8985187

Elevation & Design Approach

StarGate's elevations is 197 feet

Approach to Public Transport

Public transportation is a key principle of the project and the Boring Co. Terminal would be ideal for delivering spectators and tourists to the area.

Environmental Friendliness

We will improve air quality by increasing the tree canopy.
Animal habitat(s) and waterway(s) will not be disturbed.

Green Efficiency

Net Zero is important and integral to the core aesthetics of the project.

The outer construction of the Spire will be wrapped in solar panels.

The top of the base building roof will also be wrapped in solar panels.

Distinctiveness

Key Phrases to describe StarGate;

Multicultural, Everlasting, Worldly, Iconic, Memorable, Fun, Attraction, Family Friendly, Symbolic, Net Zero / Green, Futuristic Landmark, Gravity Defying Design

Final Statement

StarGate will set forth the future footprint of San Jose as a landmark recognized around the world.
