

Wings of Change

The aim of *Wings of Change* is to develop a project reflecting the very essence of San Jose as a leading place for the future to unfold! This project, as it is not only a monument but an open oasis (garden) that welcomes the public with programs to explore, rest and meet. It hosts people, nature, and technology as a symbiosis and learning/improving processes to move forward. We seek to create a harmony between what we create with technology and what the earth has offered us as a sacred ground learning from the natives and Silicon Valley.
