

Our proposal consists of a 200-foot diameter ring -**“THE RING”**- floating at 180 feet high over the city of San Jose; it not only aspires to become the emblematic icon of Silicon Valley, but also to function as a scenic viewpoint. There, it will be possible to enjoy uninterrupted views sweeping a 360-degree panorama. It will also be a tree-shaded promenade, a curved sky pier with deck-embedded round benches, each around an observation oculus towards the park below, providing an experience close to a walk in the clouds for the people of San Jose and visitors from around the world.
