

*Silicon Valley Continuum* achieves a minimal impact on the site - giving back to nature through reinvigorated parklands, enhancing both natural and civic lifestyles. An instantly recognizable icon is generated on the site through the bold use of color and breathtaking engineering that achieves dramatic cantilevered sky decks. The disrupted “bridge” form is a metaphor for the innovation and disruption achieved within Silicon Valley, while the interactive façade and light-show canvas celebrates the technology that unites people of all cultures and our environment. The *Continuum* becomes a totem of Silicon Valley’s impact and aspirations.
