

Spirals, slopes, horizontals, verticals make ***the Bundle*** a celebration of human activity on a monumental scale

The areas around San Jose are an icon of excellence in human activity: *innovation, education, entertainment, adventure* and *sports*. We translate this human energy into lines which become the architecture of two structures, a vertical and a horizontal one, that are connected together via a 600' long zip line.

By fusing together hiking, mountain biking, sliding, ladder climbing and panoramic sightseeing with tennis, reading, partying, exploring, education, working we create an architecture that reflects the unparalleled energy of San Jose.
