

## **Dark Stars**

Giant mysterious objects filled with twinkling lights create an enchanting civic plaza at their feet. In the evenings, the ground is animated by a meadow of multicolored stars, as if they had fallen from the forms above. Fully solar powered, the objects feature a variety of public amenities. Dramatic exhibition space celebrating the history of technology is surrounded by circulation elements that weave up between an inner LED light wall and an outer skin of aluminum louvers to a viewing deck and restaurant destination above. These “dark stars” act as enigmatic icons, inviting wonder and engagement with the unknown.
