

The project is a large structure on both sides of the Arena Green Park. On the east side of the park, there is a U shaped elongated courtyard that is made of concrete walls, covered with mirrors that reach 10 meters at its highest point. It has a long paved ramp that goes down from its north entrance to a flight of stairs and a door on its other end. On the west side of the park, there are columns scattered between the trees. The columns and the courtyard are tied together by cables that have bells, lamps, fans (for air cooling by mist) and other elements hanging from it. These elements help maintain the park as well as playfully interact with its visitors.
