

The monument consists of two parts. The first part, which is nearby N Autumn St, symbolizes ideas and inspires it. Part of the human brain is the left and right hemispheres of the human brain.

Dissection occurs along the cyst of one hand - a sign that everything is one. The hand symbolizes the direction. Another part of the monument is located along the freeway. It symbolizes investors and angels who are ready to give opportunities, including financial ones. In general, the composition shows the principle of communication with people, because a handshake symbolizes business acumen, offer and hope for new peaks.

Materials for construction - thin-walled reinforced concrete and metal structures. These portals host LED screens that can transmit the atmosphere at night by displaying various paintings and color schemes. In the evening and at night, residents of the park can enjoy watching the show, like the one in the Burj Khalifa. The hands are supposed to be made of steel and glued wood, which partially covers the surface, giving a commitment to nature, aesthetics and beauty.

The shape of the monument along the streets reflects the complex path of man. With his fall and rise again, with the obstacles that arise in his way. This process can be illustrated using a sinusoid - a symbol of the activity of life, the main indicator of the pulse, the indicator of the path.

Functional use of the premises: recreation areas, gyms, a library, common areas, cafes, exhibition rooms

The monument partially kills the forest due to scale. However, some of the trees are planned to be preserved to give scale and respect for nature.

Net-zero strategy.

Net-zero strategy is achieved through the use of solar flexible solar panels that replicate the shape of structures. Also, the constructions use wood for the interior, which in turn contributes to a lower emission of harmful substances into the environment.
