

Silicon Valley has been the haven of great visionaries who shaped mankind's destiny. The Sky Tower honors their brilliance and courage, and inspires future generations.

The Tower design consists of a 200-foot white tower angled to the sky, and features:

- **Night lighting** to make the tower visible for miles.
- **Inscriptions to honor visionaries** who defined Silicon Valley.
- **Connections between common people** through a circle of monitors providing live streaming images with San Jose's sister cities.
- **Safety elements** designed to promote earthquake, wind, and night flight safety.
- **Environmental respect** through solar panels and electric batteries; carefully-directed spotlights; and no river intrusions.
