

Project Summary.

Total build area: 613,000.000 sq/ft
Maximum height (to street level): 41.40 ft

Construction materials.

The entirety of the building is proposed to be made with one kind of reinforced concrete.

Propose of the project.

The main propose of this project is to create a public space that could work on many different scenarios, day to day open air plaza, the lower level can work as a water reservoir during raining season, ii has so many different sauces it could create audio chambers where small concerts could be held or just give a shaded big public space for the hot summer days..... etc.
