

Gentlemen of the competition committee

The first post expresses the general idea of the urban planning of the Arena Green Park on the Guadeloupe River and the focus according to the color reference in the pictures attached to each walkway and the distribution of ideas on both sides of the river to add ideas and revitalize the site and downtown San Jose with various activities and events and daily and annual events.

As for the second post, it explains the main idea of establishing a large architectural monument that will rise to 200 feet. It is a metal building consisting of a steel structure and encrusted facades in various materials, metal, glass and stone And perforated metal. With an explanation of the idea and what does the idea express in the written text on the post.

Best regards.
