

Waterfall bridge was born from a desire to provide a **moment of silence, a peaceful escape** from stress of our daily life enabling **a true connection to our roots, nature, and most importantly, each other**.

The waterfall is spreading over a vast translucent canopy covering an intimate garden below. In this garden one may find a true moment of resilience. The circle shape symbolizes “home”, where everyone is safe and equal.

The bridge also intends to showcase amazing beauty of **Guadalupe river offering visitors elevated view of the river park all the way to the San José Airport**.
