

URBAN CONFLUENCE SILICON VALLEY

Project Summary 100 words

“**Light Tower 2.0**” uses three basic materials: **silicon**, in the form of frosted glass; **gold** electrum color on structures and sculptural figures; and glowing white **clouds** made of formed plastic. The silicon and gold are tributes to electronics. White clouds symbolize intuition, wonder, joy, or imminent deeper understanding.

Two **Light Towers** stand 230 feet tall, honoring the 1881 San Jose light tower. A **Causeway** extends 440 feet, directly connecting the east side of the park. The **Portal to the Future** is a braided arch rising 80 feet. A **Heritage Orchard**, with all the main crops of 1950, surrounds the Portal.
