

Project Summary

I propose two mazes, a labyrinth and a bridge connecting West and East.

On the West side a maze and labyrinth, and on the East side a maze.

A bridge will span from the West buildable area to the East buildable area.

The bridge will also serve as a higher viewing point.

Lighting will be on the mazes, observing guidelines to protect the natural habitat.

The hedges will be of native origin, and a variety of color and blooming times.

I wish for it to be free and open to all, part of a public space.
