

The goal: to create an immersive physical presence and at the same time a digital space to allow a carousel of artwork to keep the space fresh and unique throughout the years.

A bridge spanning the creek will hold aloft a central sphere.

The sphere will illuminate for a short time after dark, a canvas for artists, designers, schools, businesses, sports teams, to share new media to entertain and engage the people of San Jose.

A 600 foot long bridge spanning the creek, a 100 foot diameter sphere raised in the center. Park area designed to illustrate the balance between Nature (West Side) and Technology (East Side). A welcoming park on the West side, an educational and engaging sculpture garden and technology showcase on the East side. A natural creek habitat untouched and protected beneath the central bridge and sphere.

### The Sphere

Peak at the dome rising above the trees, marvel at the full sphere at the foot of the bridge, approach along the bridge span, enter through the door into the heart of the monument. Ride the elevator to the rooftop observation deck. Enjoy the 360 degree views of San Jose from Downtown to the surrounding hilltops. As darkness falls stake out a spot along the creek side to see what animated light show the sphere will glow with this evening. Programming of sphere illuminations will be open to local schools, community organizations, artists, designers, sports teams, companies; with an eye towards spreading the use of programming, technology, and community engagement to Bay Area children.

### The West Side

Stroll through the parks many paths. Enjoy the colorful oasis of natural life in the center of silicon valleys metropolis. Enter the ring of trees to get an unobstructed view of the sphere overlooking the Urban Confluence. A perfect place to meet friends, lay out a picnic, enjoy the diverse California nature without ever leaving the city.

### The East Side

Marvel at the ingenuity of local artisans. A sculpture garden that comes alive with active motion and illuminated installations. Charge up the energy for the sphere for tonight's illumination by spending some time on the kinetic energy panels, or just observing the solar panel or wind turbines in action. Enjoy a mural wall with regular contests for new exhibits. The East side shows off the power and magic of San Jose's ingenuity and technological prowess.
