

MURMURATION

The ARENA is a circular bridge above Guadalupe River, dedicated to public games and artistic activities.

The design seeks harmonies with the context, provides a seamless connection between people and nature, and invites people to explore the Confluence with fresh experiences.

Its construction reflects the 21st century's Art of Thinking and Art of Building.

With the highest respect to the location, the materials and lighting are carefully studied to minimize impacts on the existing wildlife.

The ARENA is not only a building but also a messenger that goes beyond time and material to transmit unmeasurable values to the next generations.
