

The “Sky Gardens” of San Jose is the vision that the site is foremost a PARK, that it should be enjoyed by magnitude of people SIMULTANEOUSLY and that it should be a world class visible ICON. Combination of these ingrained notions gives us the solution _ the Elevated Gardens. **The Sky-Gardens affords sweeping views of the city and the mountains beyond. The top surface is a park with fully grown mature trees. The suspended waterfall at the center of the revolving restaurant is the Emotional Heart of the project, that hovers exactly over the confluence of the two rivers.**
