

## URBAN CONFLUENCE | **COMMUNITY PLATFORM**

### PROJECT SUMMARY

This project focuses on creating a highly visible, dynamic community platform for both the local neighborhood and the wider city of San Jose. It consists of a 14-story tower that is designed to serve a diverse variety of community organizations and activities, including sports, art, library, and health and human services. This tower is designed to support maximum flexibility, allowing it to evolve and adapt with the needs of the community. The surrounding landscape will stitch the tower into the site and extend community activity programming out into the park. The result is a distinctive urban icon that celebrates the cultural activity it facilitates and sustains.
