

## Project Summary

The idea stems from the fact that Silicone Valley was named for the use of Silicon, the most widely used elements. And thanks to Silicone Valley, technology reaches the world. The concept of form is part considering the world and the silicone molecule, the base is the molecule supported by three elements, are shaped like a door and represent, the past, present and future, focuses on Silicone Valley for the world, the structure is based on the meridians and parallels. The parallels are divided into two parts, upper for vegetation and live birds, the lower one for lighting.
