

The epicentre of innovation is mankind!

To rejuvenate, reinvigorate and enliven the urban civilisation is the soul purpose of this Confluence. The design is made with the intention of not only being the landmark but to be a way of life for the inhabitants of the city. Created to look inwards and reflect. The structure is woven to integrate the built form with the ecology. Responding to evolve with the environment and evoking the senses . The movement within is like a concentric maze structured between two walls symbolic of the solidarity, of the two environments' nature and built form.
