

Le Penseur

The Thinker

Technology is rapidly changing the world and driving people forward. In Silicon Valley - the world's epicenter of innovation, Can we pause and think for a while?

The project consists of a theater, a restaurant & book bar, a meditation center, and an elevator. It is powered by semi-transparent solar glass that covers the building's surface. The spherical meditation center is divided into 150 separate Spaces where people can enjoy the scenery or meditate.

Le Penseur

The Thinker

At night, the projector will play live video from cameras scattered around the world on the surface of the building, you can see what is happening elsewhere on the planet at the same time: the amazon rainforest is being cut down, the Antarctic glaciers are melting, the fighting in Syria and so on.
