

Le Penseur

This project consists of 4 parts: elevator, theater ,coffee& book bar ,meditation center.

Electricity is provided by translucent solar glass covering the surface of the building.

The spherical meditation center is divided into 150 independent spaces where people can enjoy the scenery and meditation.

At night, the projector will play live video from cameras scattered around the world on the surface of the building, you can see what is happening elsewhere on the planet at the same time: the amazon rainforest is being cut down, the Antarctic glaciers are melting, the fighting in Syria and so on.
