

HATCHING is a confluence of science and art. It offers free working spaces for tech start-ups and free venues for young artists to display their work. It creates an architectural space open to all, where people can communicate, share and witness the birth of some great ideas.

1. The exterior frame of the building is inlaid with solar panels.
2. The observation deck, where people can enjoy the distant scenery, and the circular stage in the middle where concerts and electronic music parties can be held.
3. Gym, all the equipment can convert the power people consume into electricity.
4. Coffee shop provides a place for people to rest and communicate.
5. Free office area for tech start-ups.
6. Free exhibition area for young artists, can also be used for creative fairs.
7. Maze & Gallery, wall screens can display artists' work and product ideas from tech start-ups, it can also be used to video chat with people.
