

CC: Cosmos Confluence embellishes San Jose's urban confluences by introducing a new confluence on a cosmic level. The structure is a confluence of two opposing elements bringing the best out of each other, as San Jose does daily. Comprised of a triangle, the most powerful visual anchor and a spiral-like structure holding three telescopes, it forms a link with the cosmos. The strength and chic design of the exterior elevation, and the dreaminess, colorfulness and innovativeness of the interior represent the characteristics of San Jose's people.

CC: Cosmos Confluence gives visitors a feel and glimpse of the stars and planets.
