

Project Statement

Based on the competition brief. I have designed a concept that will attract people from all works of life, and all corners of the globe to silicon valley.

The chrome giant is a monument that will be visible from miles around. It will extend 30/40 ft in height
Lighting will be underneath both feet and in the palm of the extended hand.

I have designed an interactive monument, where Visitors can sit on the giants palm for a photo op.

It is a monument that will be iconic.
as the bull is to wall street and "the bean" is to Chicago.
The chrome giant will be to silicon valley
