

“Urban Spiral” of San Jose is a hub of communities, a visual of splendor, and a symbol of innovation. The concept derives from the form of the landmark – two embracing spiral stairs, ascending to the sky, and rippling into surrounding communities and eco-corridors via swirls of paths. It allows people to climb up to the sky deck and enjoy the existing and new horizons of San Jose downtown and the valley from different heights, perspectives and outlook points. Embellished by an intelligent LED lighting system, it hosts splendid daily lighting shows as well as special shows on occasions.
