

## **Human Convergence**

Icons locate place and mark the memorable. This celebrative complex aims to be an unforgettable signpost to match the fascinating mythology of the Valley's knowledge community. Its visionaries jumpstarted the resetting of the world order by recalling the revolutionary changes Florence brought about in the Renaissance. Our project both landmarks the present and expresses the convergence of Nature, Culture and Technology to create a more humane future. Its activated ground plane will bring diverse groups of people together as better human beings in a harmonious way, built on a common vision, where compassion for "otherness" is imbued with renewed humanity.
