

## ProjectSummary.doc

This solar powered one hundred and twenty-five foot "Guardian" has powerful presence, sparkling white granite pillars and stained glass that projects light in primary colors. The interlacing stainless steel framing coupled with the filtering light through the stained glass windows, creates an interior space that is a surreal landscape housing the giant Helix that evokes a magical feeling of the INFINITE possibilities of human discoveries. An Icon rooted to our earth, guarding and representing the transcendence of the human soul, bridging and finding balance between the environment, technology, and the many people of the world.
