

The Portal to Silicon Valley

A simple circle inspires our proposal for a Landmark in San José. The circular form is the oldest symbol for inventive genius. Situated between the Station, freeway and Airport, it becomes a symbol of motion, unity and our planet. As an integral part of the monument, the skywalk offers visitors impressive views over city. In pure white color during the day, the Portal will shine at night in mild light, projecting the iconic circle against the dark sky over San José. Its size and its shape make it visible and recognizable from near and far.
