

Silicon Valley: INNOVATION with LOVE

Upon visiting Silicon Valley (The place that changed the world), all you see is just concrete buildings. There is absolutely NOTHING over there that really feels like Silicon Valley. People most of the time have no clue what's happening there unless they visit a specific office or a shop. The idea is to **Capture the Essence of Silicon Valley** into design and **Celebrate its Culture of Innovation and Technology** by **displaying its latest inventions**. Doing all that, but **with Love!**

Why Love? Because, the current circumstances of the world and the adversities that we have been facing lately show that no matter how technologically advanced or innovative we become, the world certainly cannot live without love. And, we should never forget that!

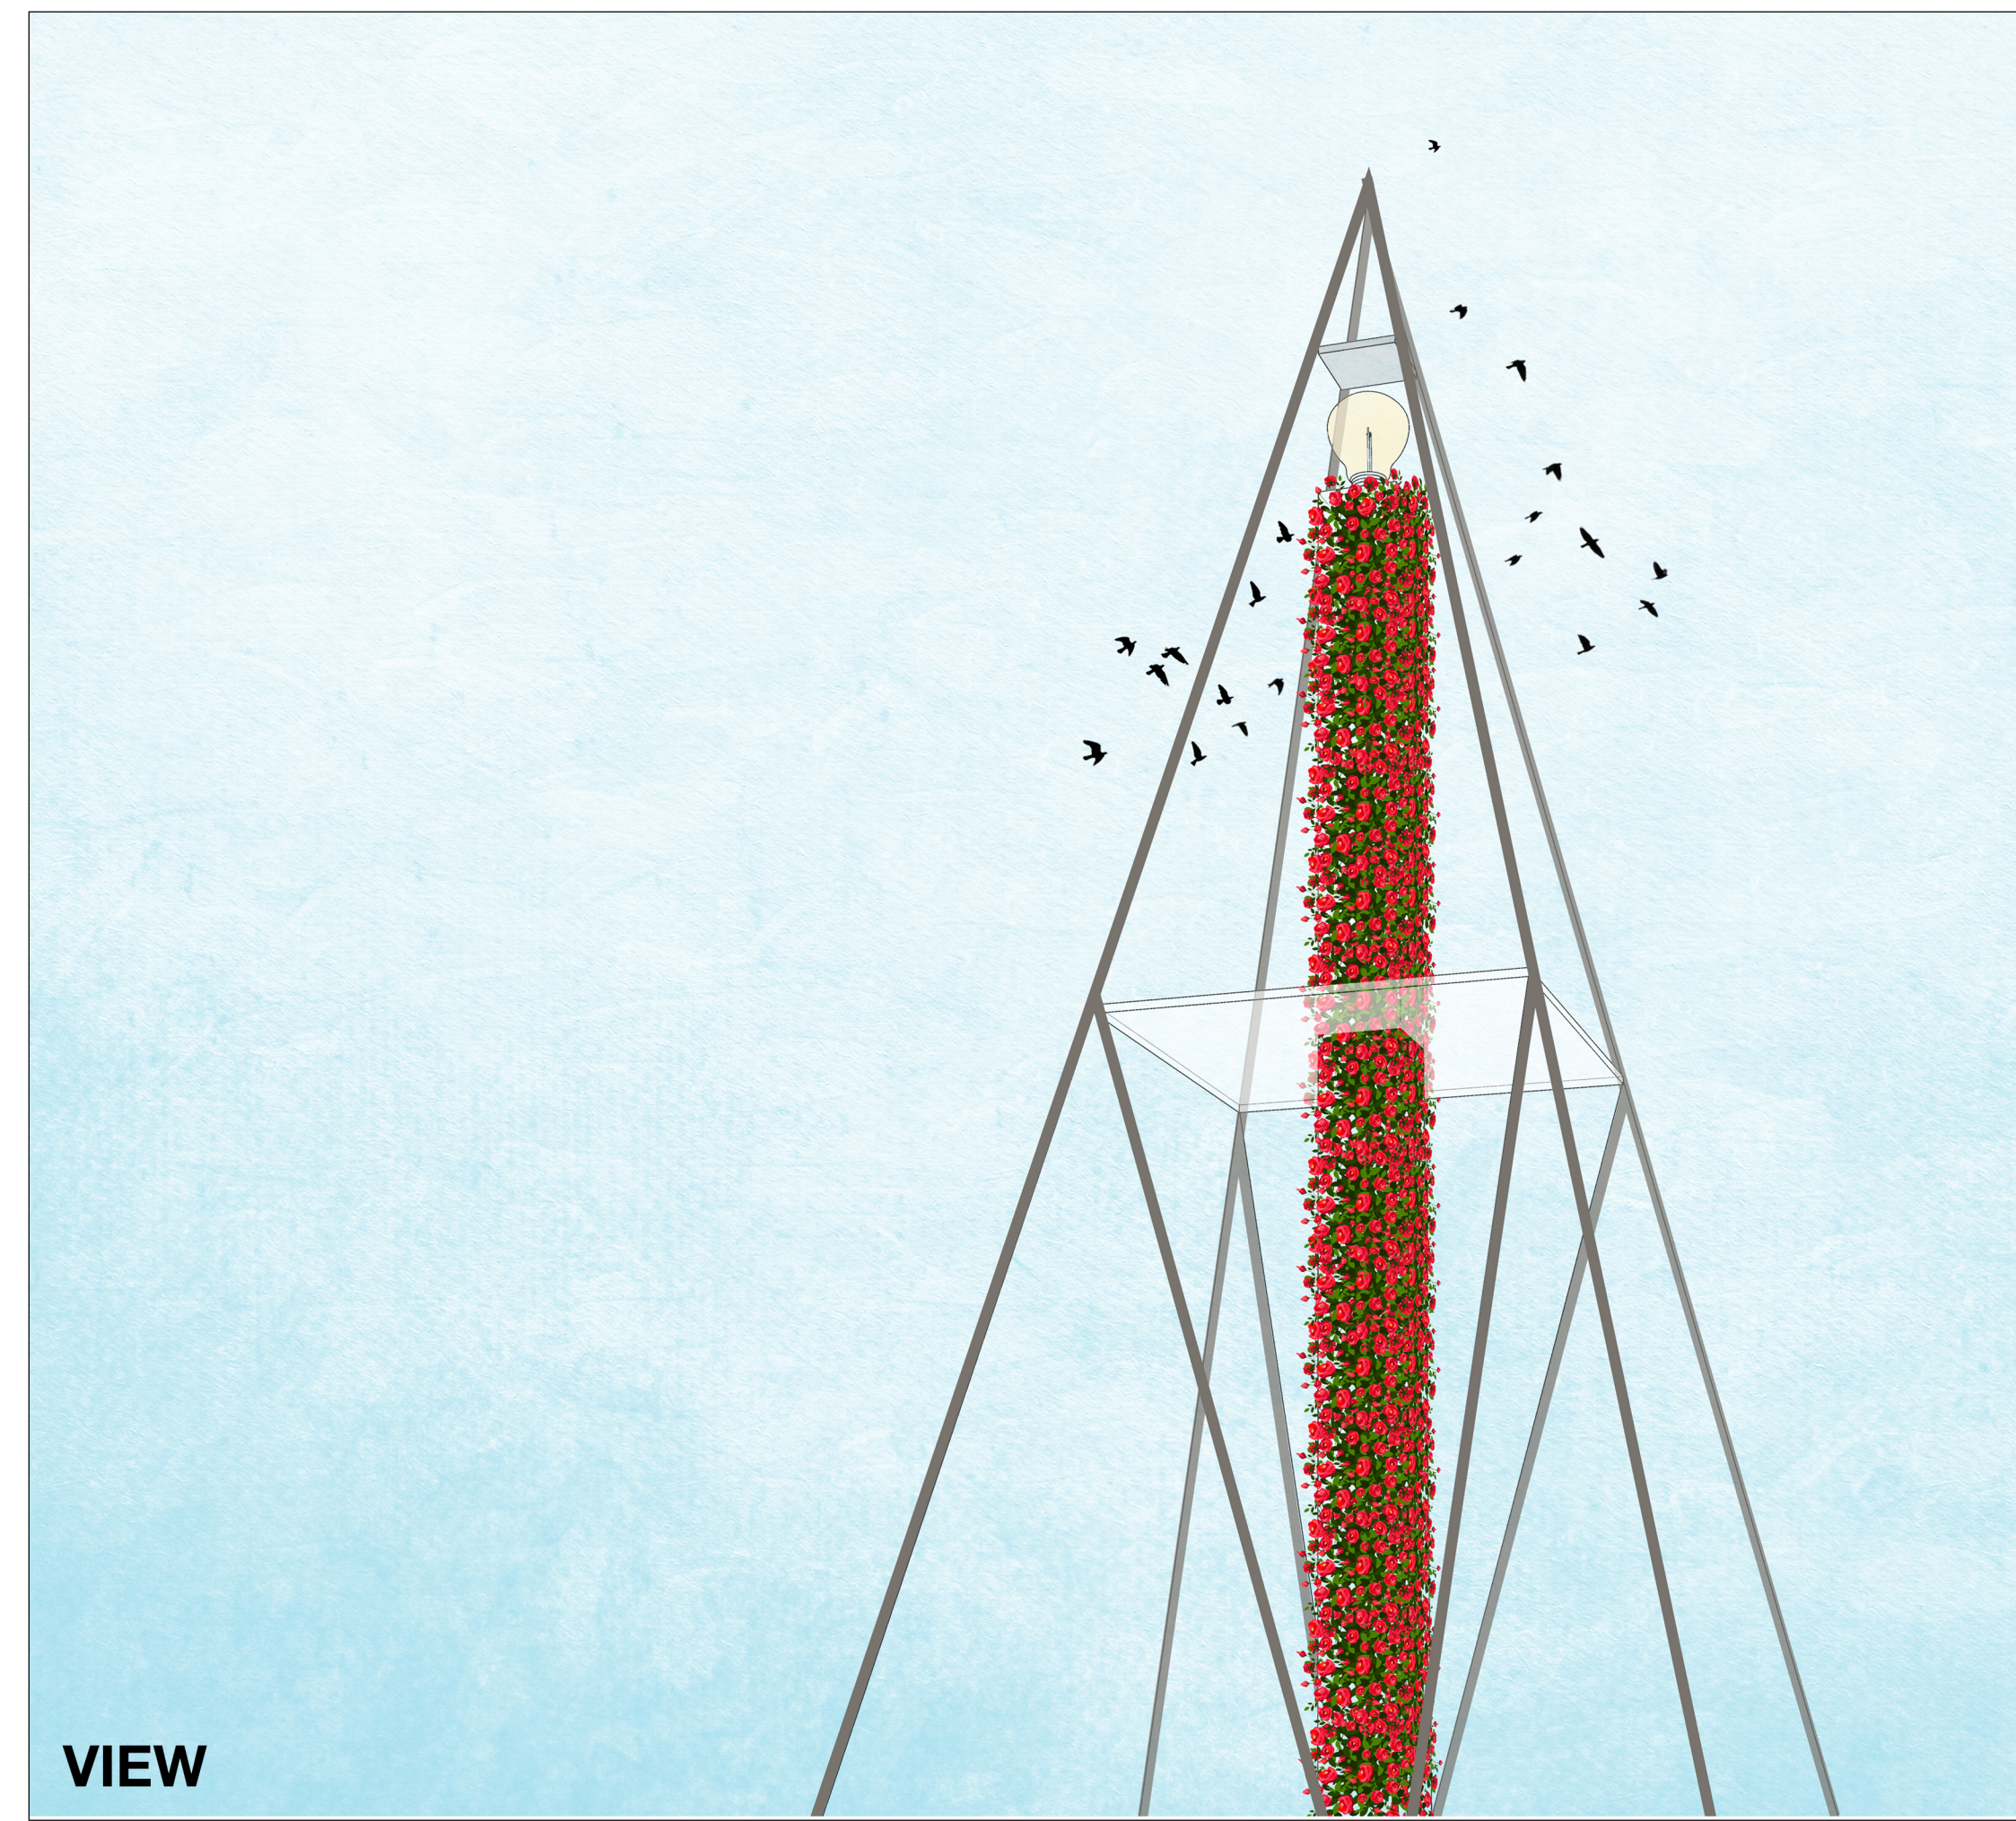

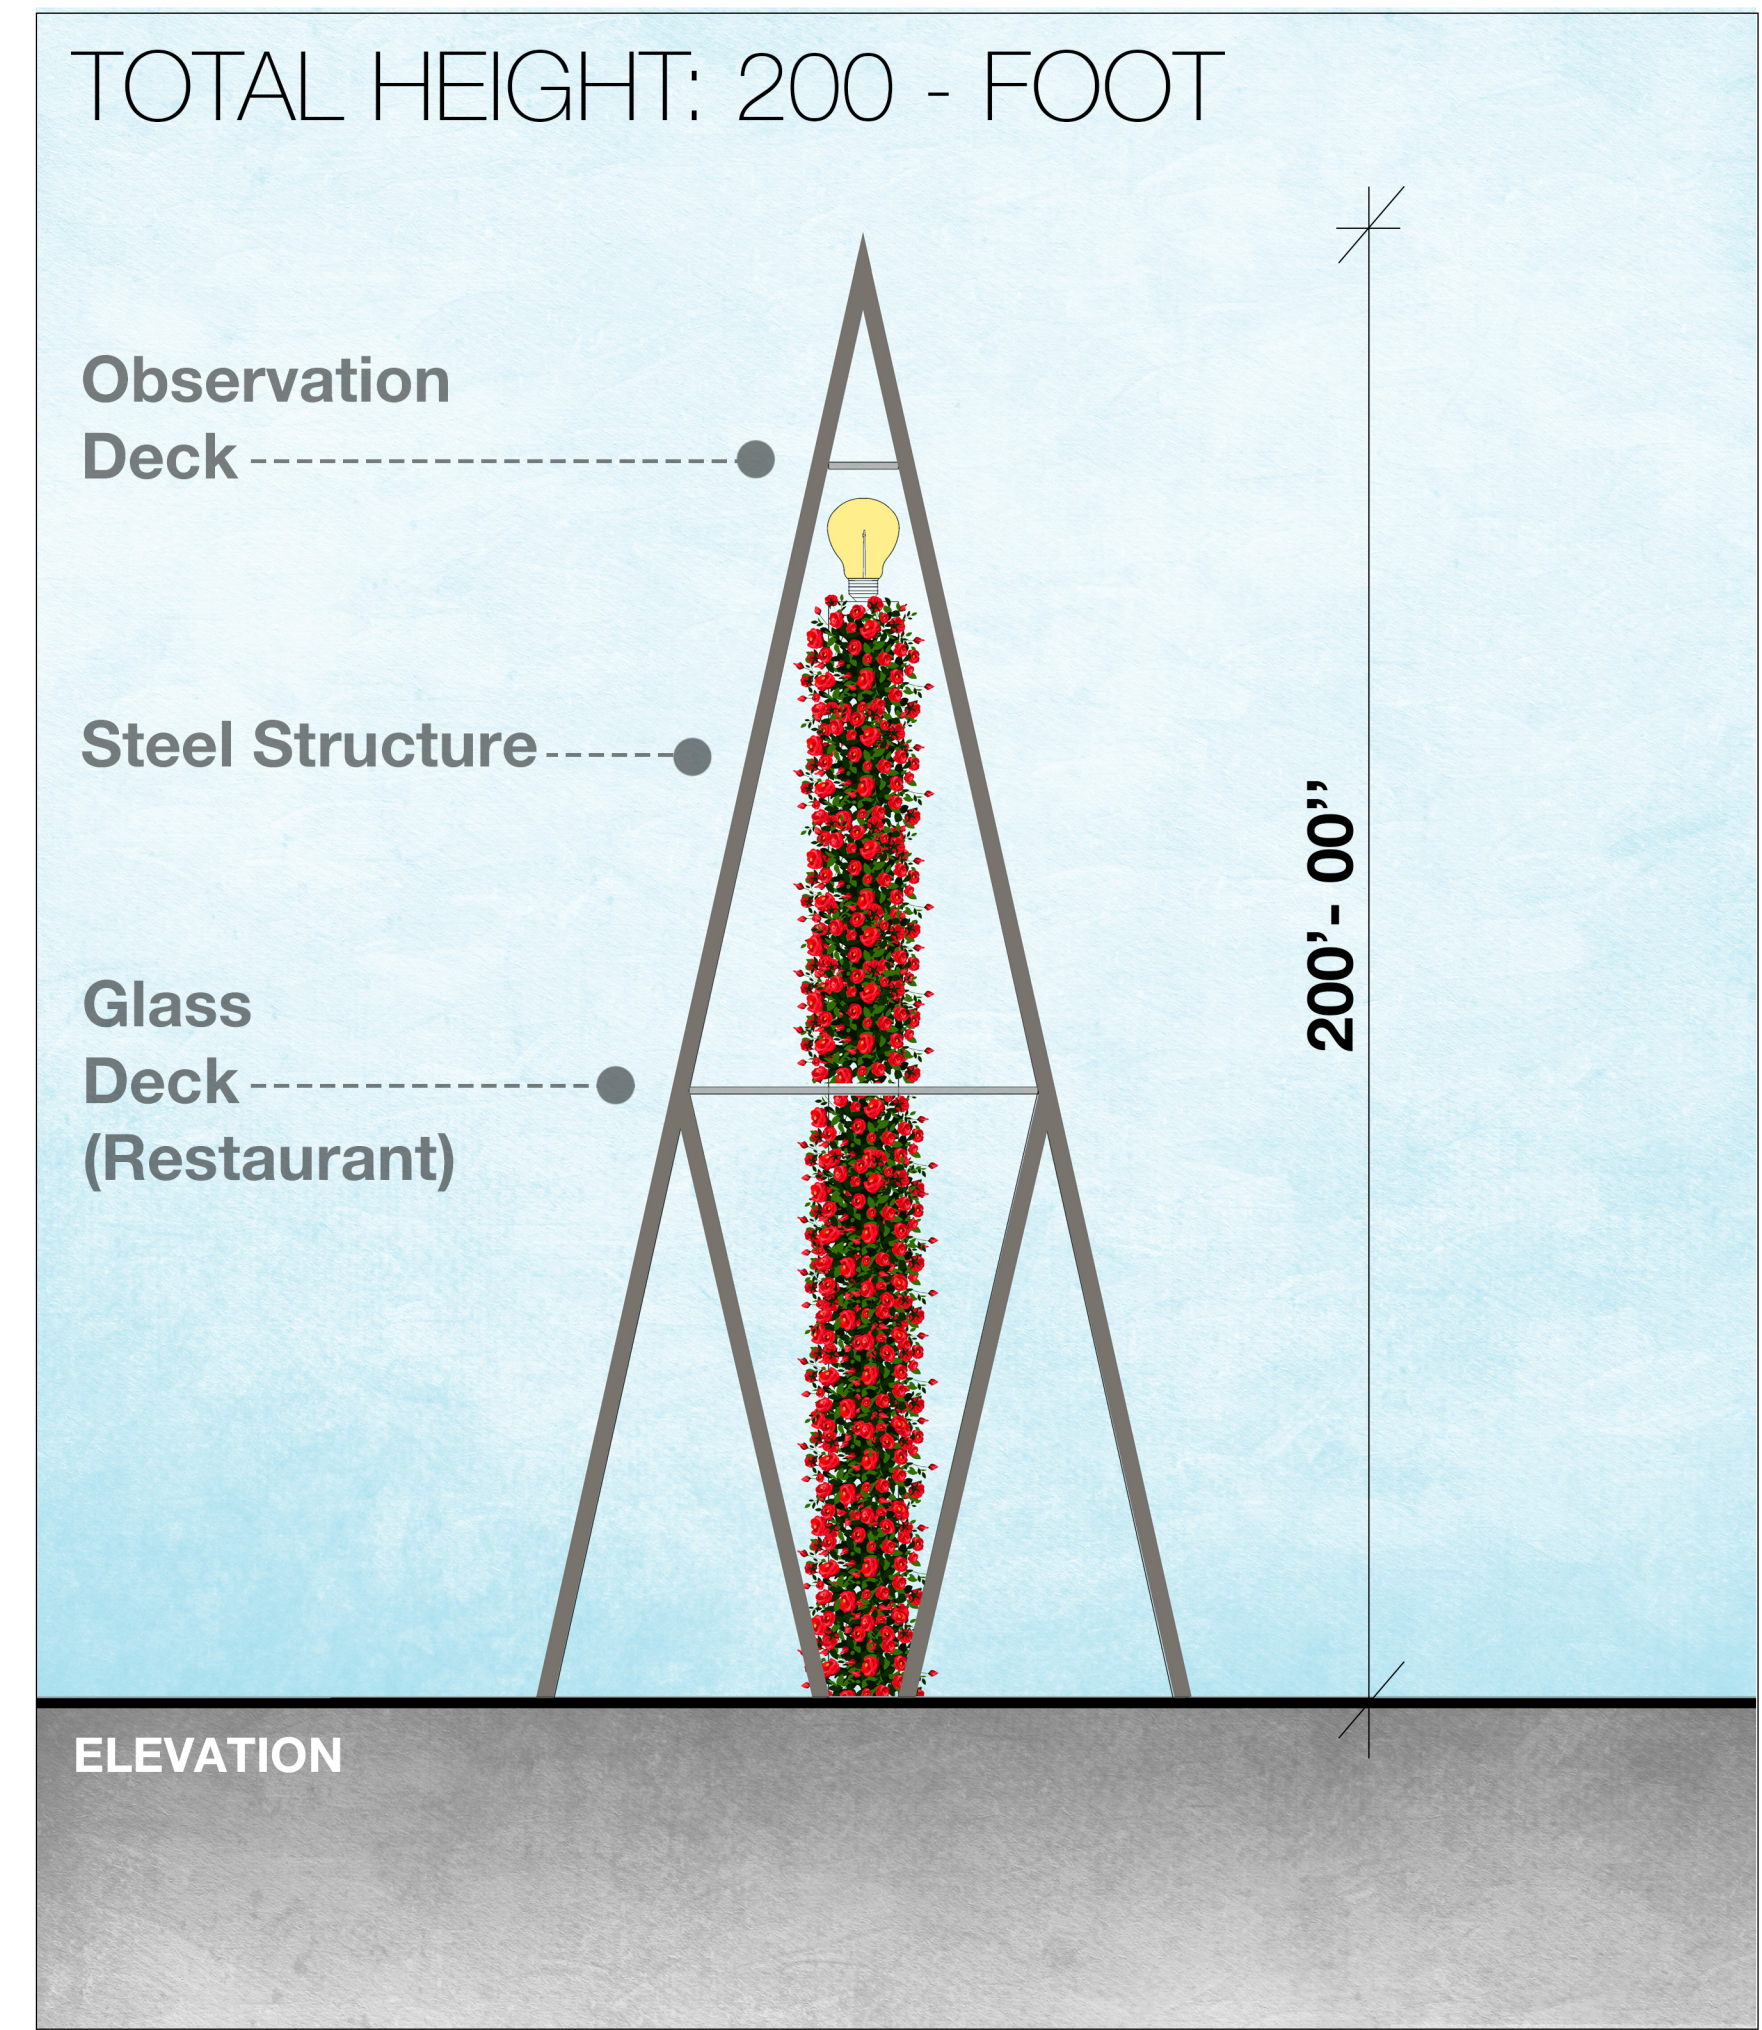

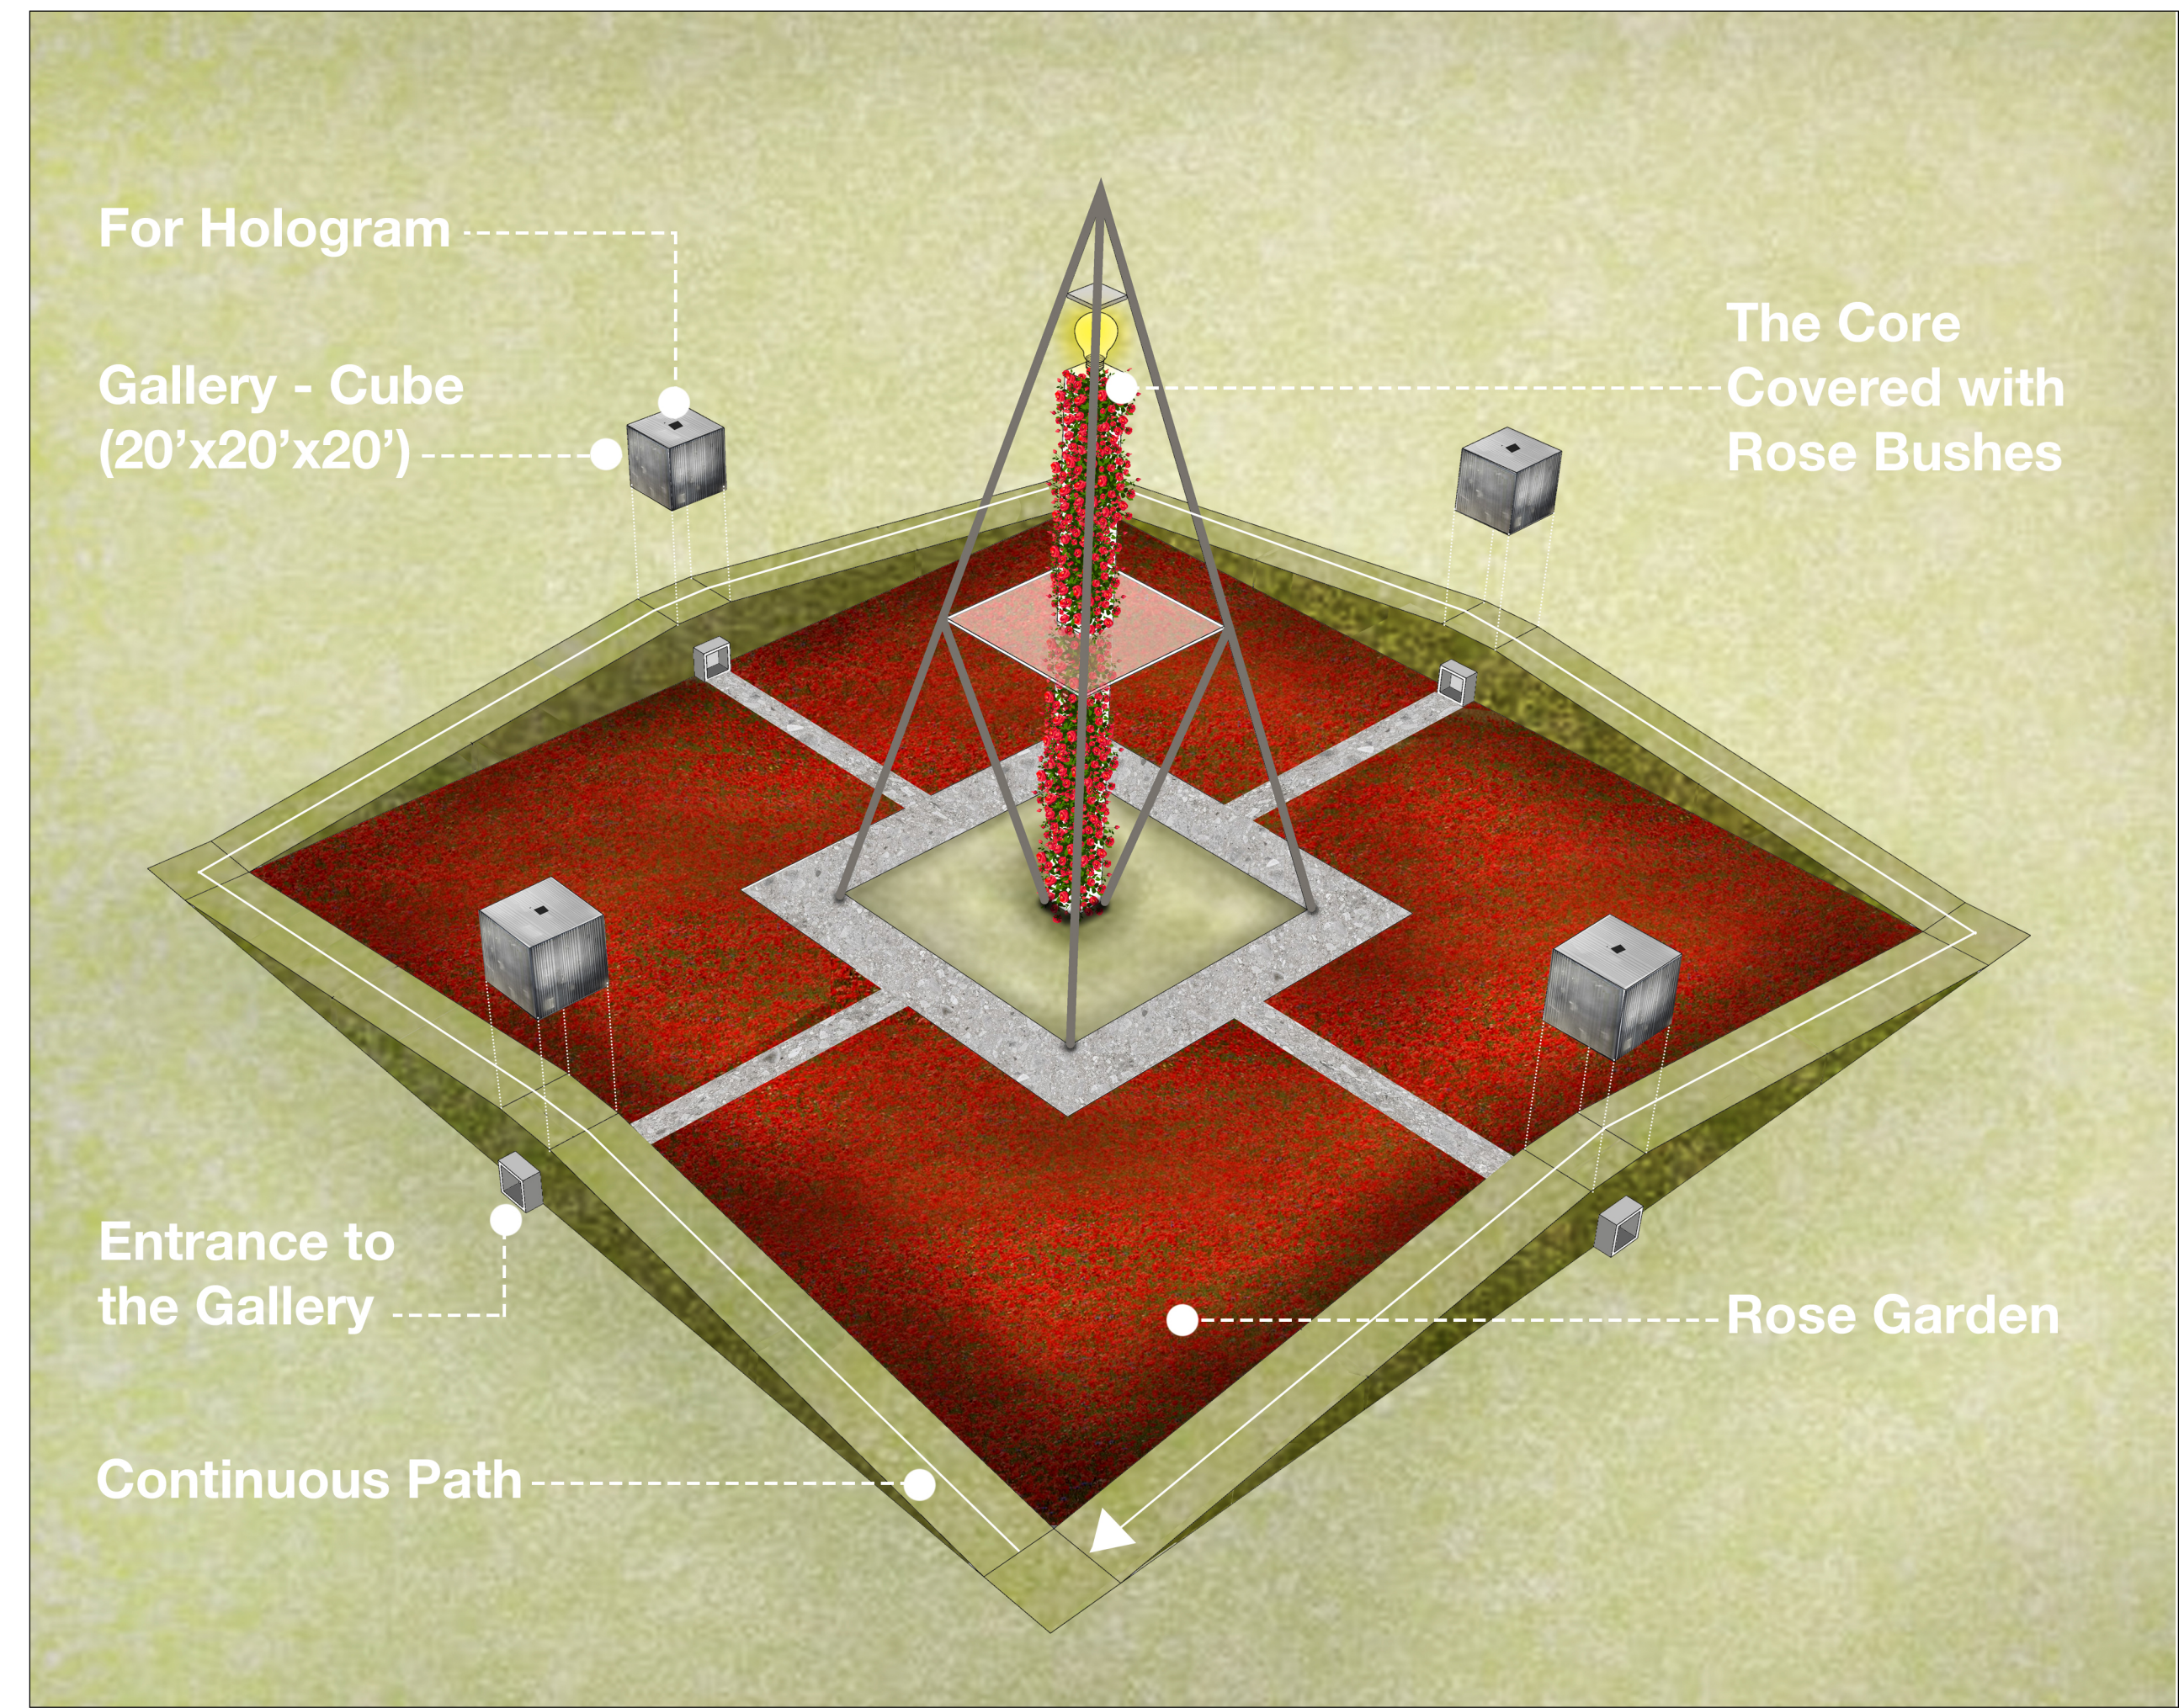

SITE:

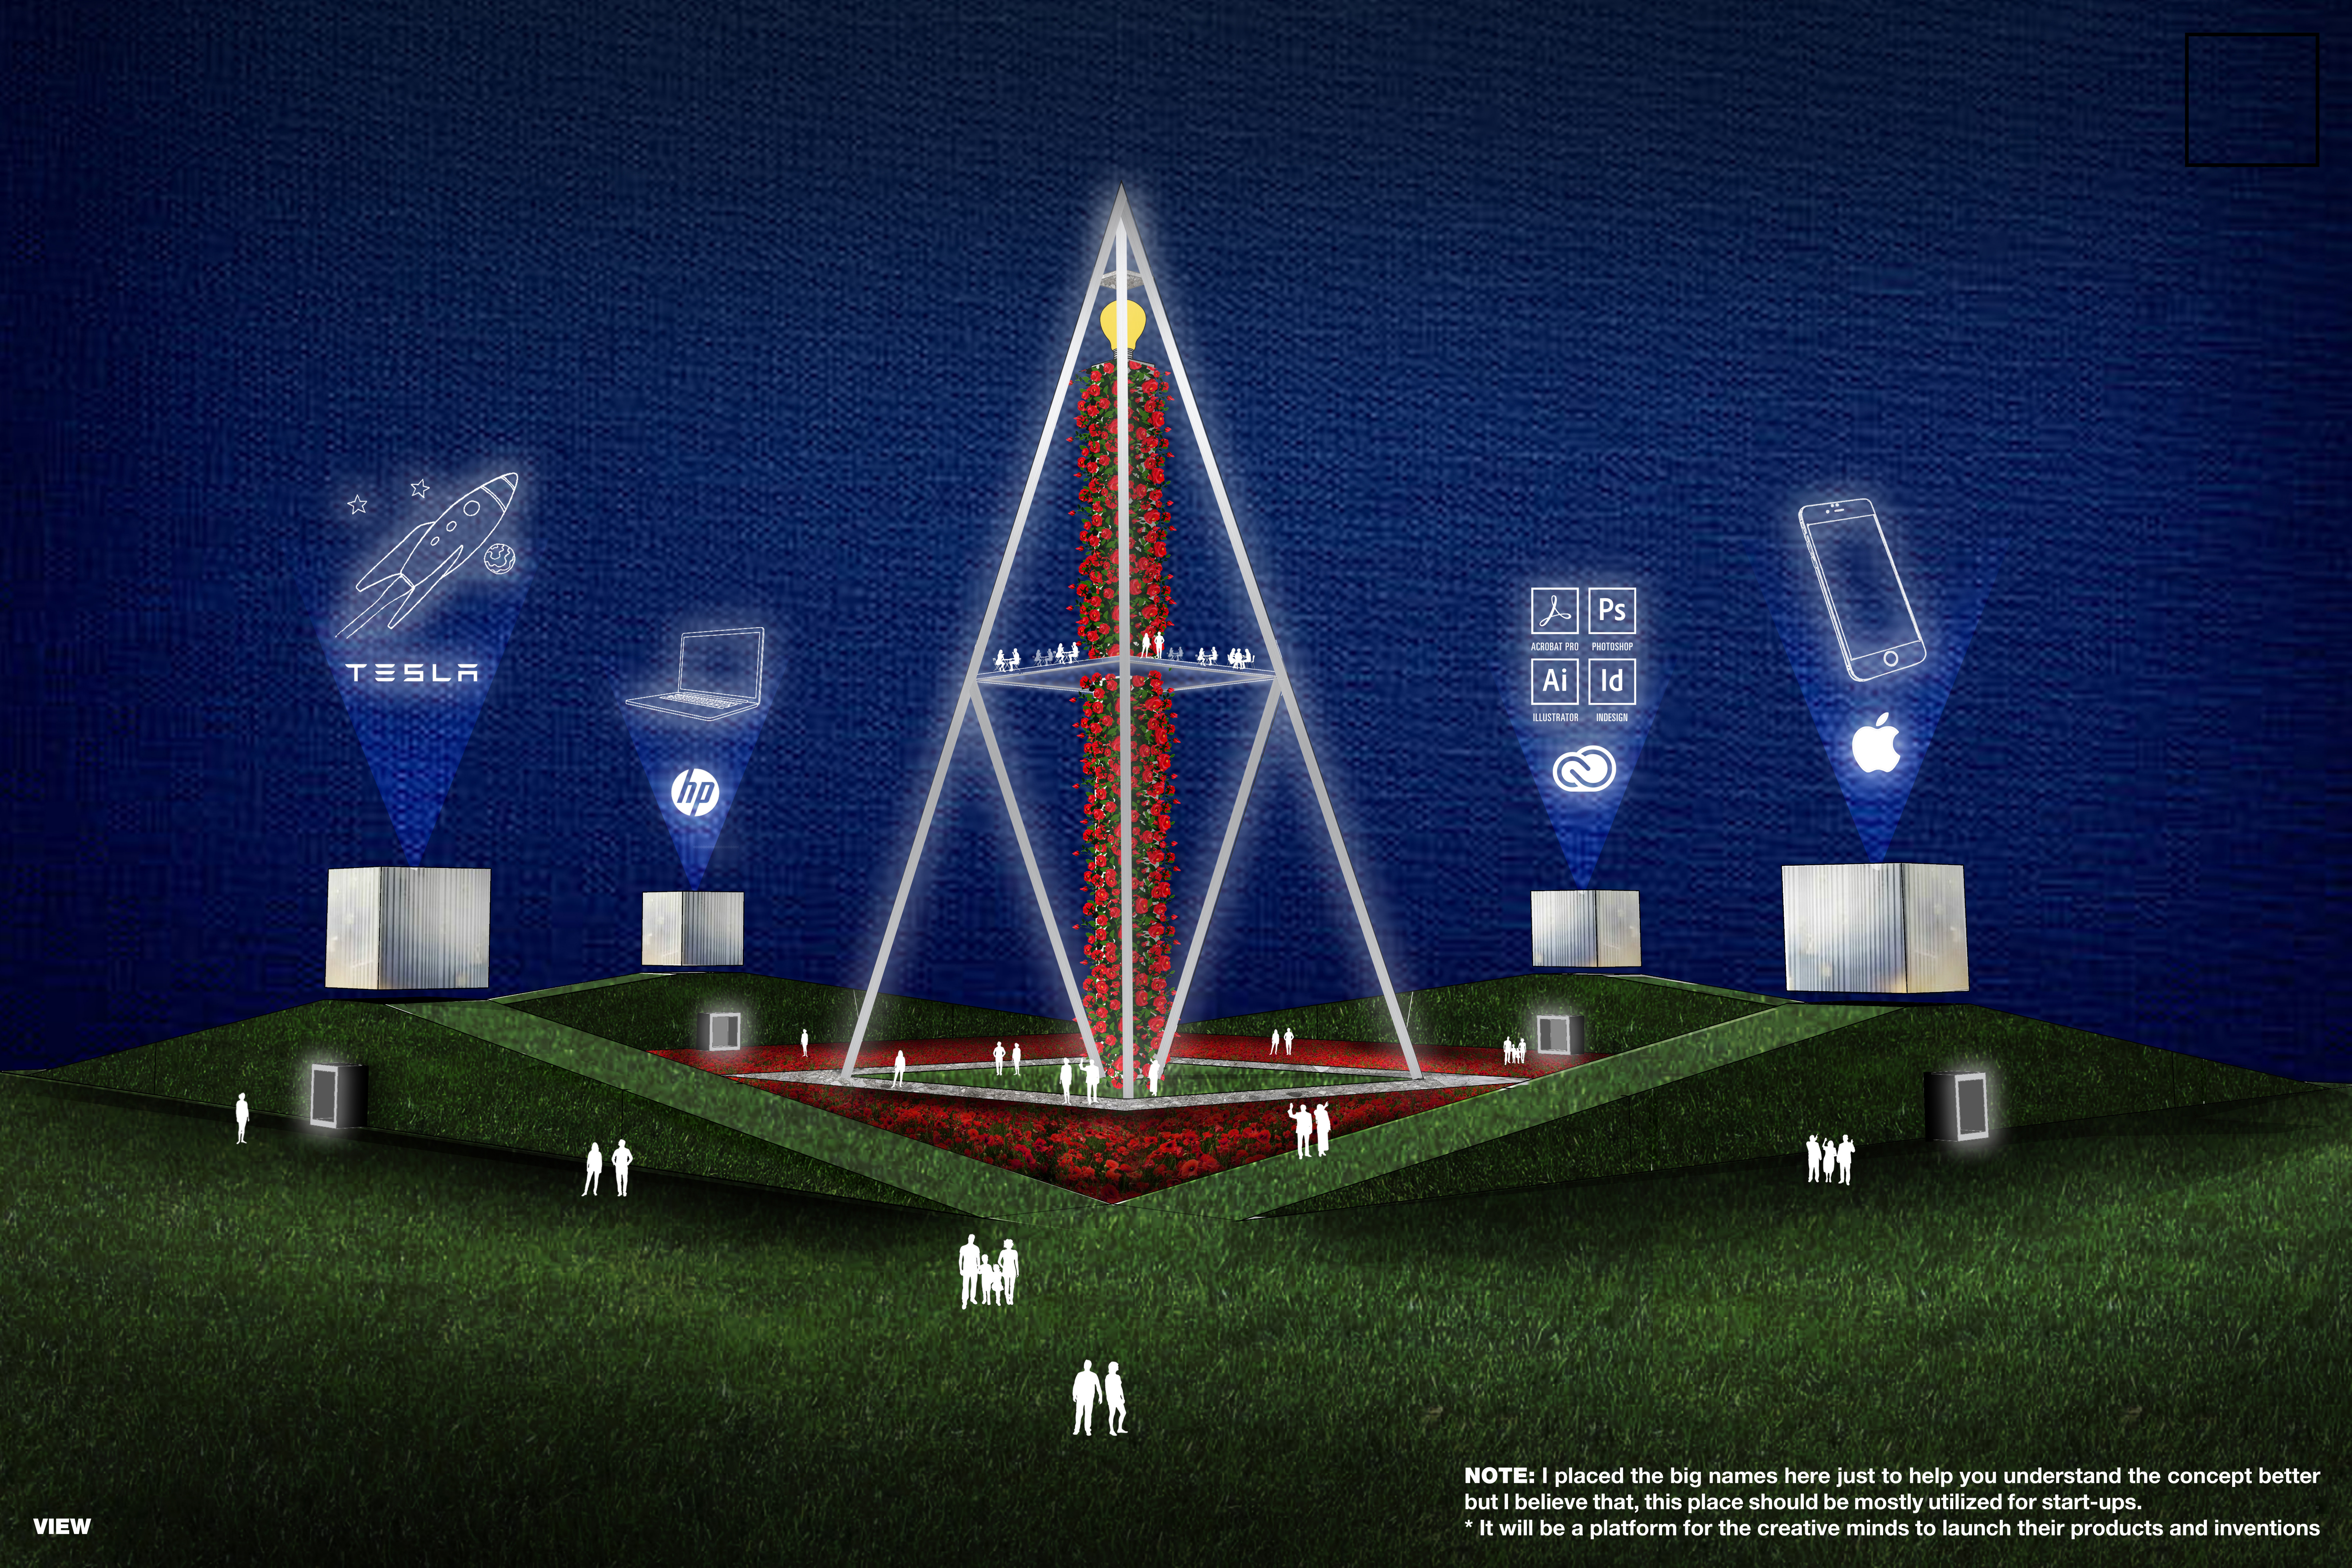

WEST SIDE of the site is chosen as it has larger area and hence, it offers more opportunity in terms of designing. It also provides a transition zone both visually and physically. East side on the other hand has no transition as it is right next to the highway.

DESIGN CONSIDERATIONS + DESIGN PROCESS:

1. **Capturing the Essence of Silicon Valley**
2. **Iconic + Symbolic A Landmark to the City**
3. **Looking from the Pilot's perspective**
4. **Making it Bird Friendly A home to the Birds :)**
5. **Activating the Space by providing a Restaurant**
6. **Lots and Lots of Love**

VIEW

NOTE: I placed the big names here just to help you understand the concept better but I believe that, this place should be mostly utilized for start-ups.
* It will be a platform for the creative minds to launch their products and inventions
